# ABOUT US

- Sumak Pompa was established in 1992; It is a company with 100% Turkish capital that produces submersible pumps, hydrophores, centrifugal pumps, fire pumps, electric motors and electrical control panels. Sumak Pompa continues its design, production, marketing, sales and after-sales support activities in a closed area of 21,500 m<sup>2</sup>.
- With our experience in the pump industry, we produce pumps and pump systems in accordance with NFPA 20, TSE, ISO and CE standards. These systems are used to create reliable living spaces in a wide range of areas, from residences to office buildings, from industrial facilities to energy facilities and the fuel and gas industry.
- Sumak Pompa, which is involved in every stage of the development of the pump industry in Turkey, follows and implements technological developments worldwide and has increased the number of variety of products to 1050, its annual quantity to 135,000 and its exports to 65 countries.
- Sumak Pump's products, which it produces in accordance with international standards, with the awareness of the difficulty and sensitivity of operating the opposite duo of water and electricity together, have been registered with TSE-TSEK-CE quality certificates. Product groups, all of which are under the assurance of Sumak Pompa, are offered to customers through 880 sales points and 175 authorized service networks in the domestic market.
